Examiner's Detailed Office Action

1. Claims 1-9 have been canceled.
2. Claims 10-41 are allowed.

REASONS FOR ALLOWANCE

3. The following is an Examiner's statement for reasons for allowance:
4. The closest art *Labe, Jr. et al.* (USPAP 2002/0091605), *Schirripa* (USPN 6,282,520), does not teach or render obvious applicant's claimed invention. In particular, as pointed out below, the art lacks certain features and the combination as specified in the respective claims.
5. With regards to claim 10 *Labe, Jr. et al.* and *Schirripa* does not disclose integrating a plurality of factor models corresponding to the plurality of asset classes, where integration of the plurality of factor models is based at least in part on, one or more global factors that capture covariance among factors associated with the plurality of factor models, and exposures of the factors associated with the plurality of factor models to the one or more global factors.
6. With regards to claim 21 *Labe, Jr. et al.* and *Schirripa* does not disclose integrating a plurality of factor models corresponding to the plurality of asset classes, where integration of the

Art Unit: 2121

plurality of factor models is based at least in part on data derived from the steps comprising, determining one or more global factors that capture covariance among factors associated with the plurality of factor models, and determining exposures of the factors associated with the plurality of factor models to the one or more global factors.

7. With regards to claim 32 *Labe, Jr. et al.* and *Schirripa* does not disclose integrating a plurality of factor models corresponding to the plurality of asset classes, where integration of the plurality of factor models is based at least in part on data associated with the plurality of factor models corresponding to the plurality of asset classes, and an estimated factor model with one or more global factors that captures the covariance among factors associated with the plurality of factor models.

8. With regards to claim 36 *Labe, Jr. et al.* and *Schirripa* does not disclose integrating a plurality of factor models corresponding to the plurality of asset classes, where integration of the plurality of factor models is based at least in part on data derived from the steps comprising, determining data associated with the plurality of factor models corresponding to the plurality of asset classes, and determining an estimated factor model with one or more global factors that captures the covariance among factors associated with the plurality of factor models.

9. With regards to claim 40 *Labe, Jr. et al.* and *Schirripa* does not disclose determining a factor risk model, having one or more factors, for each of the asset classes, combining the factor risk models to form and output an aggregate risk factor model based at least in part on data associated with each of the factor risk models comprising, one or more time series of returns to the factors, a factor covariance matrix, and a specific covariance matrix to form and output an

Art Unit: 2121

aggregate risk model with wider scope than the factor risk models, and wherein the aggregate risk model is consistent with each of the factor risk models.
